

HAZIBAG

A GREENER, SAFER, EASIER AND MORE COMPLIANT WAY TO CONTAIN AND TRANSPORT HAZARDOUS/COSHH WASTE

Hazibag in a snapshot

- Solid hazardous waste container
- Comes flat-packed for easy storage
- Ideal for COSHH waste
- Helps keep sites safe and tidy
- Encourages better hazardous waste management
- Ideal for use in restricted access areas
- National collection service available

The product

- The 200 litre Hazibag holds the equivalent of one drum and is ideal for emergency spill response and COSHH waste including mastic tubes, aerosols, paint tins and sealants
- The benefits of Hazibags are being experienced by many top construction companies including Kier, Mace, Bam, Durkan and McNicholas to name a few
- Hazibags are being used to demonstrate innovation and good practice in hazardous waste management on the Considerate Constructors Scheme (CCS) online best practice hub

The benefits of Hazibag

- **Highly visible on site**
Bright orange, the bags stand out and encourage good practice in waste management by staff and subcontractors
- **Space saving and easy to store**
Empty bags are flat-packed, helping keep sites tidy, improving health and safety, and general housekeeping
- **Suitable for restricted access areas**
With reinforced straps, these bags are certified for lifting and are suitable for use on roofs and other restricted access areas
- **Immediately available**
Easily stored and instantly ready for use, the bags can be immediately available on site
- **Fit for purpose**
UN approved for the containment of solid hazardous waste, Hazibags come with public and product liability insurance
- **National collection service**
Can be collected by your existing waste carrier or Windsor Waste Management
