

HAZIBAG

Hazibag UK is part of the Windsor Integrated Services Group

**A GREENER, SAFER, EASIER AND MORE
COMPLIANT WAY TO CONTAIN AND
TRANSPORT HAZARDOUS WASTE**

W W W . H A Z I B A G U K . C O M

Hazibag is an award winning flexible intermediate bulk container (IBC) which provides a greener, safer, easier and more compliant way to contain and transport solid hazardous waste.

UN approved for Packing Groups II and III, Hazibag was developed to overcome some of the limitations of existing, less practical, non-compliant hazardous waste collection systems such as drums, wheeled bins and cut-off rigid IBCs.

The many environmental, health & safety and practical benefits of Hazibags are being experienced by a range of industries across the UK including construction, manufacturing, oil and gas and asbestos removal.

The strong and flexible Hazibag provides many benefits over traditional solid hazardous waste containers:

- **Flexible and versatile**

Hazibags are suitable for a wide range of solid hazardous wastes including COSHH waste, spill response, contaminated soil, asbestos waste and Japanese knotweed.

- **Highly visible on site**

The orange bags stand out and encourage good practice in waste management by staff and subcontractors.

- **Space saving and easy to store**

Empty bags are flat-packed and take up far less space in delivery and storage than traditional containers helping keep sites tidy, improving health & safety and general housekeeping.

- **Suitable for restricted access areas**

With reinforced straps, bags are certified for lifting and are suitable for use in restricted access areas.

- **Immediate availability**

Easily stored and instantly ready for use, the bags can be immediately available on site.

- **Reduced transport emissions and costs**

Empty Hazibags take up far less space in delivery than traditional containers. Over 100 flat packed Hazibags fit on a pallet taking up the space of four 200 litre drums or one IBC, greatly reducing the carbon emissions and cost of transporting hazardous waste.

- **National collection service**

As a UN certified product, Hazibags can be collected by your existing licensed waste carrier. Alternatively, Windsor Waste Management offers a fully compliant UK wide transportation and disposal service.

- **Fit for purpose**

Hazibags are UN approved for the containment of hazardous waste and come with public and products liability insurance unlike many other traditional containers.

Hazibags come in different capacities and are designed for a variety of material streams and sizes of job.

200 litre

This conveniently-sized bag holds the equivalent of one drum and is suitable for smaller jobs. Certified for Packing Groups II and III, the 200 litre bags are ideal for emergency spill response and COSHH waste including mastic tubes, paint tins and sealants.

Size: 650mm x 430mm x 900mm

Max load: 250kg

Volume: 200 litres

One cubic metre

This standard bag holds the equivalent of an intermediate bulk container (IBC) or five drums. Certified for Packing Groups II and III, the 1 cubic metre bag is ideal for emergency spill response, COSHH waste including mastic tubes, paint tins and sealants, contaminated soil and Japanese knotweed.

Size: 1m x 1m x 1m

Max load: 800kg

Volume: 1,000 litres

1.5 metre

This lengthy bag is certified for Packing Group II and III and is ideal for full sheets of asbestos.

Size: 2.5m x 1.5m x 0.4m

Max load: 550kg

Volume: 1500 litres

Support materials

We also provide support frames for the 200 litre and one cubic metre Hazibags and hazardous waste signage to facilitate safe and correct usage.

As a UN certified product, Hazibags can be collected by your existing licensed waste carrier or by Hazibag UK's sister company Windsor Waste Management. As the sole distributor of Hazibags in the UK, Windsor Waste Management has **the best understanding of collection requirements** and provides fully compliant, UK wide transportation and disposal for Hazibags as part of our solid hazardous waste service.

We provide the **most appropriate vehicle and handling equipment** to suit customers' sites, the waste stream, and quantity and type of Hazibag.

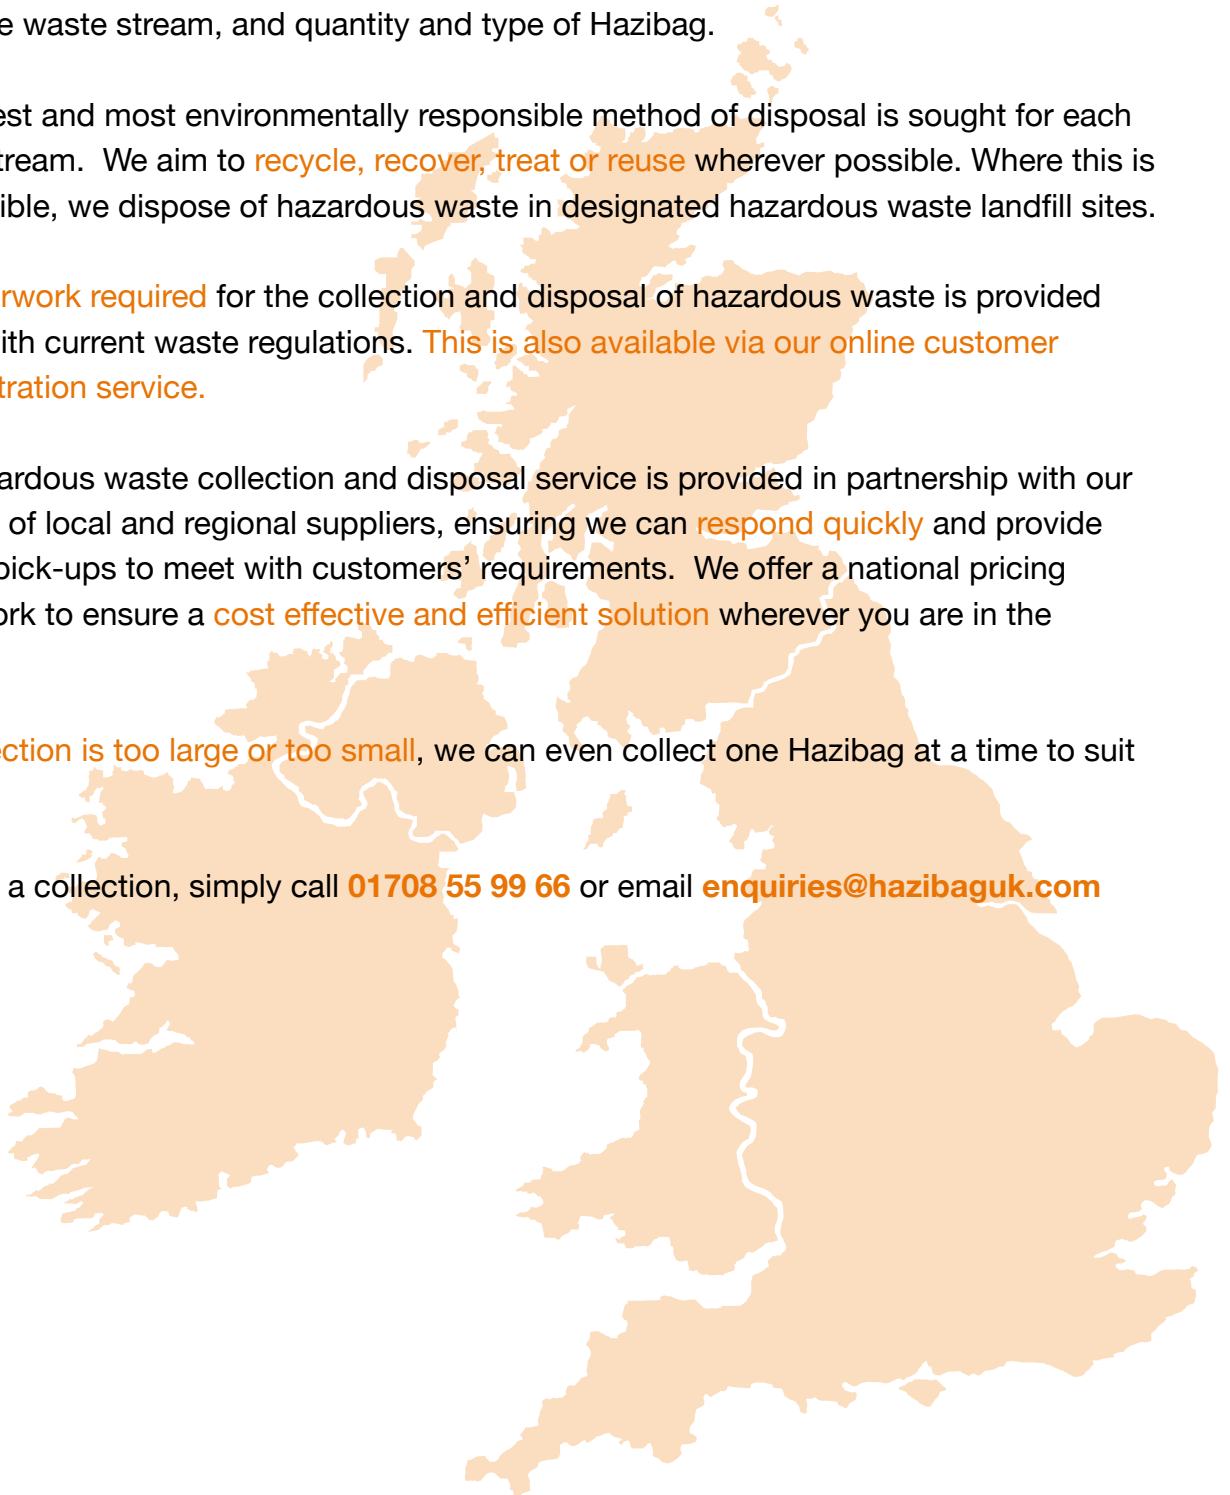

The safest and most environmentally responsible method of disposal is sought for each waste stream. We aim to **recycle, recover, treat or reuse** wherever possible. Where this is not feasible, we dispose of hazardous waste in designated hazardous waste landfill sites.

All paperwork required for the collection and disposal of hazardous waste is provided in line with current waste regulations. **This is also available via our online customer administration service.**

Our hazardous waste collection and disposal service is provided in partnership with our network of local and regional suppliers, ensuring we can **respond quickly** and provide regular pick-ups to meet with customers' requirements. We offer a national pricing framework to ensure a **cost effective and efficient solution** wherever you are in the country.

No collection is too large or too small, we can even collect one Hazibag at a time to suit you.

To book a collection, simply call **01708 55 99 66** or email **enquiries@hazibaguk.com**

Hazibag UK's sister company Windsor Waste Management is the exclusive licensee for Hazibag in the UK.

Understanding the limitations of existing, less practical and non-compliant collection systems, we sourced this innovative product from Australia in 2012. We developed a product range to suit the UK market and launched Hazibag UK in 2013. Hazibags are now being used across the UK by many top construction companies and in other industries including manufacturing, asbestos removal and oil and gas.

Hazibag is being used to demonstrate innovation and good practice in hazardous waste management on the Considerate Constructors Scheme (CCS) online best practice hub and won a Green Apple Environment Award for Commerce and Industry in 2015.

Hazibag UK is part of Windsor Integrated Services Group which offers a range of products and services designed to help businesses manage their resources and waste in a more sustainable and compliant way.

The group also includes:

Windsor Waste Management

A market leader in the asbestos disposal industry and a significant provider of total waste management services for construction and related industries across the UK

ARI Global Technologies

A unique thermochemical treatment process that destroys asbestos and produces an inert product that can be recycled in construction applications

Waste Cost Reduction Services

Providing national waste management solutions for businesses with multiple sites and waste streams that are looking for increased recycling, lower costs and better solutions

Waste Confidence

Authenticating businesses zero waste to landfill claims with the UK's only independently verified zero waste to landfill certification scheme

Hazibag has been recognised by the Considerate Constructors Scheme. Visit its Best Practice Hub at www.ccsbestpractice.org.uk/entries/hazibags

"Innovation and the sharing of best practice are at the core of Mace's sustainability strategy. We want to be recognised as one of the leaders in sustainability and we always seek to introduce innovative solutions which will benefit the environment while reducing costs and inefficiencies. The Hazibags are helping us deliver a consistent message across the site around the way we manage and control hazardous waste."

Stephanie Taylor | Environmental Manager
Mace

"Hazibags are far more convenient than drums and wheelie bins as they take up much less storage space and are instantly available when required. Holding copies of the UN certification on site gives us peace of mind that our hazardous waste is contained and transported compliantly. Also, as Hazibags are UN approved and certified for lifting, they can be opened up at the point of waste generation ensuring that it is disposed of correctly. All of this and the fact that we are reducing our carbon emissions by using the Hazibag make it the obvious choice for the containment and disposal of our hazardous (COSHH) waste".

Alan Zipfell | Site Manager
Kier London

"Hazibags have certainly been a good investment, making segregation a lot easier to follow. What I have noticed is it makes the Sack Store a lot more pleasing to the eye, as it is neat, tidy and more organised than previous storage methods."

Will Johnston | Safety Officer
Stena Drilling

"After having a review on waste, we realised we could do better on segregating waste. These Hazibags are bright orange which means everyone on sites knows where they are and what they are used for which means better compliance. Now, carrying out audits on waste, we are finding closer to 100% compliance across the Group."

Emma Murray | Senior SHE Business Partner
