waste management ltd

# 1 Your waste in safe hands

---

Windsor Waste Management is a market leader in the asbestos disposal industry and a significant provider of total waste management services to construction, demolition and related industries across the UK.

We put our customers at the heart of what we do offering:

- **An immediate response**

Whether you require advice, a quote or a quick turnaround on service, we provide an immediate response to meet even the most urgent requirements

- **A reliable, quality service**

We pride ourselves on meeting the highest standard of service, not just once but time and time again, delivering a cut above the competition

- **Nationwide coverage**

With an established network of supplier partners who work to our high quality standards, we can meet any recycling or waste management requirement anywhere in the country

- **A professional approach**

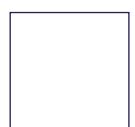

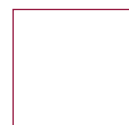

We employ skilled and experienced staff, giving you confidence that we can advise you on the most cost effective and efficient way of disposing of your waste in line with legislation and environmental best practice

- **Integrity and innovation**

We conduct ourselves with integrity, looking for the correct solution for you and not the one that suits us, and are committed to continual service improvements that make your life easier

- **Full compliance**

With our uncompromising approach to meeting legislative requirements and ensuring best practice, you know that your waste is in safe hands

## 2 Making your life easier

---

Our bespoke recycling and waste management services are designed to make customers' lives easier by providing comprehensive solutions and support services whatever your requirements. This includes:

- **Total waste management**

We really do deal with all types of waste, not just the everyday wastes that are easy to manage

- **All types of storage**

We supply a full range of containment for all wastes including open and enclosed skips, waste safes, drums, tanks and the innovative Hazibag

- **Day and night time collections**

Recognising our customers' operational constraints, we provide collection services around the clock

- **Full range of disposal options**

We offer the full range of disposal options for all your wastes and are keen to achieve 100% diversion from landfill for our clients where possible

- **Toolbox talks**

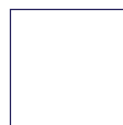

We offer toolbox talks to help your staff understand their responsibilities and to help you improve your waste management practices

- **Online customer admin service**

Our online customer administration service means your completed documentation is available whenever you need it

- **Consignment note sales**

We sell unbranded consignment notes and complete EA site registrations to make it that little bit easier for our clients when dealing with their hazardous waste

## 3 All types of waste

We provide environmentally responsible and fully compliant storage, collection and disposal services for all types of waste, as a stand-alone service or part of a total waste management package.

### Asbestos waste

A market leader in the asbestos disposal industry, we service asbestos removal companies, the demolition industry and private customers, accepting all types of asbestos.

We stock a full range of well maintained, sealed containers for larger quantities of asbestos and provide a van collection for smaller quantities.

We operate a number of transfer stations across the South East & Wales and work with a network of asbestos transfer and disposal facilities throughout the UK to provide nationwide coverage.

### Commercial waste

We offer a full range of recycling, recovery and disposal options for the wastes generated by commercial activities including paper and cardboard, plastics, metals, confidential waste and food waste.

### Construction materials

We provide full recycling and waste management services to construction, demolition and related industries across the UK.

We offer a range of containment and collection methods for all types of waste generated during all phases of construction and demolition from hardcore, wood and plasterboard to contaminated soil, hazardous waste, waste water and sewage. With a focus on environmental responsibility, we deliver 100% diversion from landfill wherever possible.

### Contaminated land and fly tip

With extensive experience and knowledge of all aspects of contaminated land, we clear all sites whether contaminated from historical use, accidentally or through fly tipping. We can provide full WAC analysis where required and advise you on the best disposal route for all contaminants including elevated hydrocarbons, heavy metals and asbestos content.

## 4 All types of waste

---

### Hazardous waste

Our specialist team has extensive

experience in dealing with hazardous waste and can advise you on correct and legal storage and disposal of even the most difficult wastes. We

provide a full service including identifying, packing, labelling, transporting and disposing of all types of hazardous waste including paint tins, aerosols, resins, oily rags, spill kits, acids, batteries and oils.

### Lead paint and shot blast

As one of the UK's only specialists in

disposal of lead paint and shot blast, we collect and test samples to analyse and identify coatings that may contain hazardous

substances, such as lead and other heavy metals, as well as providing containment and disposal.

### Waste electrical and electronic equipment (WEEE)

We provide storage, transportation and

disposal for all types of hazardous and non-hazardous WEEE including computers and IT equipment, fridges and other large appliances,

fluorescent tubes and batteries.

### Sewage

We provide collection and disposal services

for sewage via our network of local service providers and disposal sites, minimising transport emissions and associated costs.

### Other types of waste

We really do deal with all types of waste.

More recently we have collected and disposed of aviation fuel and soils contaminated with asbestos.

## 5 A little bit about us

---

### Our company

Windsor Waste Management is a market leader in the asbestos disposal industry and a significant provider of total waste management services to construction, demolition and related industries across the UK.

A fully licensed and highly accredited recycling and waste management company, our certifications include international standards for environmental management ISO 14001, quality management ISO 9001 and health & safety OHSAS 18001. We are also Achilles Link-up and FORS bronze accredited.

In our drive to stay at the forefront of our industry and to help our customers do the same, we are members of the Environmental Services Association (ESA), Asbestos Removal Contractors Association (ARCA), Asbestos Control and Abatement Division (ACAD), Road Haulage Association (RHA) and National Federation of Demolition Contractors (NFDC).

An independent recycling and waste management company, we are fast growing and have a reputation for quality, reliability and excellent service.

## 6 A little bit about us

### Our group

Windsor Waste Management is part of Windsor Integrated Services Group which offers a range of products and services designed to help businesses manage their resources and waste in a more sustainable and compliant way. The group also includes:

### HAZIBAG

- an innovative way to contain and transport solid hazardous waste that overcomes the limitations of drums, IBCs and other traditional containers

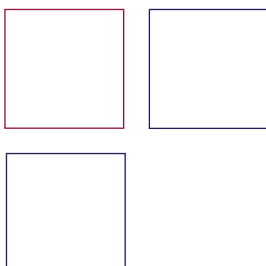

- a unique thermochemical treatment process that destroys asbestos and produces an inert product that can be recycled in construction applications

- providing national waste management solutions for businesses with multiple sites and waste streams that are looking for increased recycling, lower costs and better solutions

- authenticating businesses zero waste to landfill claims with the UK's only independently verified zero waste to landfill certification scheme
